

# What does blood do?

Label the parts of the blood indicated in the diagram.

For each part you label, write down its function.

The diagram shows a circular field of view containing several types of blood cells and platelets. At the top, a box points to a white blood cell. On the left, a box points to a red blood cell. On the right, a box points to a platelet. At the bottom, a box points to another red blood cell. Each box contains a 'Name' and 'Function' label followed by dotted lines for writing.
